VATA/KAPHA | Winter-Week 7
## MENU

### MONDAY | 1
Warm Shrimp and Escarole Salad

### TUESDAY | 2
Winter Abundance Bowl with
Garlic Ginger Pumpkin Seed Sauce

### WEDNESDAY | 3
Simple Sesame Noodles

### THURSDAY | 4
Vibrant Green Coconut Curry

### FRIDAY | 5
One Pot Chickpea Shakshuka

## PREP

### MONDAY | 1
Rinse and tear escarole into large piece. Chop and quarter veggies. Squeeze 1 tablespoon lemon juice.

### TUESDAY | 2
Clean and soak the rice and lentils if desired. Squeeze 3 tablespoons lemon juice.

### WEDNESDAY | 3
Slice the green onions and mince garlic.

### THURSDAY | 4
Thaw spinach, mince ginger and garlic, dice shallots.

### FRIDAY | 5
Prepare veggies. Rinse and drain chickpeas.
# SHOPPING LIST

## MEAT & SEAFOOD
- Shrimp | 3/4 pound

## VEGETABLES & FRUIT
- Garlic | 1 bulb
- Radishes | 4
- Escarole | 1/2 head [5 cups]
- Lemon | 2
- Broccoli | 1 head
- Yam | 1
- Red Cabbage | 2 cups
- Ginger | 1 inch
- Green Onions | 2
- Shallot | 2
- Spinach | 4 ounces [frozen]
- Red Bell Pepper | 1

## DAIRY
- Unsalted Butter | 1/2 tablespoon
- Parmesan Cheese | 1 1/2 tablespoon

## BAKERY & MISCELLANEOUS
- Anchovy Filets | 1 [packed in oil]
- Capers | 1 tablespoon
- Basmati Rice | 2/3 cup
- Green Lentils | 1/3 cup
- Pumpkin Seeds | 1 cup
- Fluid Thin Noodles | 6 ounces
- Light Coconut Milk | 2 cans [14 ounces]
- Diced Tomatoes | 1 [14.5 ounce] can
- Tomato Paste | 1 1/2 tablespoon
- Chickpeas | 1 [15 ounce]
- Kalamata Olives | 2-3 individual olives

# PANTRY STAPLES
- Olive Oil
- Kosher Salt
- Ground Pepper
- Sea Salt
- Cold Pressed Olive Oil
- Apple Cider Vinegar
- Cayenne Pepper
- Soy Sauce
- Sugar
- Rice Vinegar
- Pure Sesame Oil
- Hot Chili Oil
- Canola Oil
- Coconut, Avocado, or Grapeseed Oil
- Ginger [minced]
- Curry Powder
- Coconut Sugar or Maple Syrup
- Sea Salt
- Cornstarch or Arrowroot Starch [optional]
- Smoked or Sweet Paprika
- Cumin
- Chili Powder
- Cinnamon
- Cardamom
- Coriander
Eastern View: Escarole is bitter and the bitter taste is said to overpower or correct all the other tastes. This makes the bitter taste one of our best sources of medicine. When we say that bitter corrects the other tastes, we are saying that bitter corrects the effects of over-doing the other tastes. For example, if you have been overindulging in sweets this time of year to satisfy that sweet tooth, you may be feeling a bit heavy, dull and slow. You can lay off the sweets and take some bitter herbs instead to clean out.

Escarole is strongly anti-bacterial, anti-viral and anti-parasitical due to its strong drying effect. And bitter greens have the quality of reducing environmental toxins as well. Adding the sweeter tastes of shrimp will provide some heat and moisture for Vata/Kaphas who need heat. The bitter taste “increases intelligence,” and due to its clearing qualities, can help reduce brain fog that you can feel in winter. Most of the herbs used to support mental function have a strong bitter component.

Shrimp: At only 7 calories per shrimp, we can eat a relatively large amount of this shellfish without using up too many of our daily calories. Shrimp provides us with significant amounts of so many nutrients. We usually have to eat foods with a far greater calorie content to get the nutrient richness provided by shrimp. For example, 20 shrimp that provide us with about 140 calories also provide us with 25 grams of protein or 50% of the Daily Value. They also provide over 80% of the Dietary Reference Intake level for adults.

According to Ayurveda, there is this substance called ojas. In Sanskrit, ojas means health and vitality. Vata/Kaphas especially are prone to low ojas this time of year, so vitality building foods are important. Shrimp is one of the better ojas producing foods.

Western View: Escarole is a powerhouse of nutrition. Each 1-cup serving is rich in dietary fiber, vitamins, minerals and antioxidant compounds. To get the maximum health benefits, the Centers for Disease Control and Prevention advises eating dark, leafy green vegetables, such as escarole, regularly. A 2009 review of nutrition research published in "Nutrition Reviews" suggest that high inulin and fiber content in escarole help reduce glucose and LDL-cholesterol levels in diabetes and obese patients. It also promotes gut health for any digestive problems the Vata in you is causing.

According to The American Institute for Cancer Research, dark green, leafy vegetables such as escarole contain a high concentration of a variety of carotenoid compounds. These act as antioxidants by inhibiting the ability of free radicals to damage DNA. These carotenoids help prevent the development of cancers like stomach, lung, colon, skin and breast cancer.

Shrimp: What if there was a special substance in the body that governed aging, immunity, radiant skin, vigor, mood, sleep, digestion, spirituality, and physical strength? According to Ayurveda, there is. This substance is called ojas. In Sanskrit, ojas means health and vitality. Vata/Kaphas especially are prone to low ojas this time of year, so vitality building foods are important. Shrimp is one of the better ojas producing foods.
PREPARE AHEAD
Rinse and tear escarole into large pieces. Chop and quarter veggies. Squeeze 1/2 tablespoon lemon juice.

INGREDIENTS
1 tablespoons olive oil
1/2 tablespoon unsalted butter
1 anchovy fillets packed in oil, drained
1 large garlic clove, finely chopped
1 tablespoon drained capers, chopped
4 radishes, trimmed, quartered
3/4 pound large shrimp, peeled, deveined
1/2 head of escarole, torn into large pieces (about 5 cups)
1 1/2 tablespoons finely grated parmesan
1/2 tablespoon fresh lemon juice
Kosher salt, freshly ground pepper

Serves: 2
Prep Time: 10 minutes
Cook Time: 15 minutes

NOTE
Hearty escarole maintains its volume when cooked, which makes it great choice for a quick saute' with shrimp. Serve with warm bread and ghee.

DIRECTIONS
Heat oil and butter in a large skillet over medium heat. Add anchovies and cook, mashing with the back of a spoon, until anchovies dissolve and a paste forms, about 3 minutes. Add garlic and capers; cook, stirring constantly until garlic is fragrant but not brown, about 1 minute.

Increase heat to medium-high. Add radishes and cook, tossing often, until crisp-tender, about 3 minutes. Add shrimp - tossing occasionally, until just cooked through, about 4 minutes.

Add half of escarole and toss until it begins to wilt, about 1 minute. Add remaining escarole and toss until wilted, about 1 minute more. Remove from heat.

Add parmesan and lemon juice. Season with salt and pepper; toss to combine.

IF YOU ARE SHARING WITH A:

Pitta | Your Pitta friends will need a cooling yogurt raita on the side. Add a tablespoon dried mint to one cup of plain yogurt. Season to taste.

Kapha | Add 1/2 teaspoon cayenne pepper to the mix with some cracked pepper crackers.

Vata/Pitta | Perfect as is - just add a whole wheat roll and ghee.

Vata | Add a warm whole wheat roll and ghee for your Vata guests.

Pitta/Kapha | This meal may be a little heating for anyone with high Pitta. Add a cooling yogurt dip to the table.
**WINTER ABUNDANCE BOWL FOR TUESDAY**

**WHY WE CHOSE THIS MEAL FOR YOU!**

**Eastern View:** White rice (and even brown) are getting a bad rap, especially with the popularity of the Paleo diet.

There are a few foods that Ayurveda has established as good for everyone, year round, and rice is number one on the list. A grain of brown rice is encapsulated by the bran. This outer shell is full of fiber, B vitamins, and trace minerals. When the bran is removed through milling the rice is white. White rice inevitably has less fiber than brown, but it still has nutritional value and provides protein and energy. And since its outer shell has been removed it is much easier to digest.

For this reason white rice is recommended when digestive ability is low. For Vata/Kaphas who have a more sensitive digestion and weaker agni, white rice is the way to go. Rice is also a sattvic food meaning it helps produce ‘ojas’ which is Sanskrit for vitality and immunity. Vata/Kaphas are prone to ojas depletion which is why basmati rice is a great staple in their diet.

**Yams** have many medical benefits; highly restorative, carminative and a tonic. The cooling effect of yams can be a cure for hypertension, and they help reduce cholesterol levels. Often used as a slimming food because they lower cholesterol levels and promote weight loss. and also has a high concentration of key minerals. Great for hemorrhoids, arthritis, and IBS.

**Western View:** Rice is primarily composed of carbs which are mainly in the form of starch. Starch is the most common form of carbohydrates in foods, made up of long chains of glucose known as amylose and amylopectin.

Rice that is high in amylose, such as basmati rice, does not stick together after cooking, and amylose also slows down the digestion of starch, helping Vata/Kaphas feel full longer; and is often associated with so-called resistant starch, a type of healthy fiber.

Resistant starch helps feed the beneficial bacteria in the gut, stimulating their growth and in the colon, resistant starch leads to the formation of short-chain fatty acids, such as butyrate, which may improve colon health and cut the risk of colon cancer says a study by the British Journal of Nutrition.

**Yams** are pretty energy packed about 330KJ/100g (approximately). Potassium, Phosphorous and Magnesium are the key minerals found in yams. They also contain trace minerals like zinc, copper and selenium. High in calcium, and rich in omega 3 fatty acids which are known to increase the good cholesterol levels in the blood - all important as you can have high cholesterol.

Yams also contain Diosgenin, a molecular hormone which has potential anticancer effects, high in vitamin B6 content, Vitamin C and Vitamin A. Thats good for all doshas!
PREPARE AHEAD
Clean and soak the rice and lentils if desired. Make up the sauce.

INGREDIENTS
2/3 cup basmati rice
1/3 cup green lentils
1/4 - 1/2 teaspoon sea salt
1 head broccoli
1 medium yam
(leave the skin on if it’s organic!)
2 cups shredded red cabbage
juice of 1/2 lemon or lime
drizzle of cold-pressed olive oil or ghee

Serves: 2
Prep Time: 20 minutes
Cook Time: 1 hour

DIRECTIONS
Combine rice and lentils in a medium bowl, wash well till water is clear. Cover with water again and soak for up to 8 hours, if possible. Drain and rinse.

In a medium saucepan place the rice and lentils, plus 1 1/2 cups water (if soaked – add 2 cups water if un-soaked), and sea salt. Bring to a boil, reduce to simmer and cook covered until water has been absorbed and rice and lentils are cooked through (about 30-45 minutes depending on if you soaked the grain or not).

While the rice and lentils are cooking, chop the broccoli into florets and the yam into bite-sized cubes. About ten minutes before the grains have cooked (check the water level before adding veggies – if it’s dry, add a little more liquid), add the yam. After five minutes, add the broccoli on top of the yam. Saute cabbage in olive oil and salt, toss with lemon juice.

While the rice and lentils are cooking, blend the sauce (next page).

To assemble the bowl, simply spoon in the cooked rice and lentils with the steamed veggies, add the cabbage on the side and pour sauce over. Give thanks for the abundance and enjoy.

IF YOU ARE SHARING WITH A:

Pitta | Your Pitta friends will love this meal!

Kapha | Kaphas like the rice and lentils - they may need 1/2 teaspoon pepper flakes in their abundance bowl.

Vata/Pitta | A great dish for Vata/Pittas - go for seconds!

Vata | Vatas should have the cabbage cooked as it is hard for Vatas to digest raw vegetables.

Pitta/Kapha | Perfect as is! Enjoy!
GARLIC GINGER PUMPKIN SEED SAUCE FOR TUESDAY

PREPARE AHEAD
Squeeze 3 tablespoons lemon juice.

INGREDIENTS
1 cup pumpkin seeds
3 cloves garlic
knob of fresh ginger
1 tablespoon maple syrup
3 tablespoons olive oil
1 tablespoon apple cider vinegar
3 tablespoons lemon juice
3/4 -1 cup water
3/4 teaspoon fine grain sea salt
1/4 teaspoon cracked black pepper
cayenne pepper to taste

DIRECTIONS
In a dry skillet over medium heat, toast pumpkin seeds, stirring every so often, until they begin to pop. Remove from heat and set aside to cool.

In a food processor, pulse to mince garlic and ginger. Add cooled pumpkin seeds and blend on high until sand-textured.

Add remaining ingredients (start with 3/4 cup water) and blend, scraping down the sides periodically. Add remaining water as needed to suit your desired consistency.

Season to taste. Store in an airtight glass container in the refrigerator for up to five days.

NOTE
When this sauce is poured over the Winter Abundance Bowl, it’s the kind of healthy, hearty dish that is doable for every kind of person, especially those that are hungry, busy, and still care about what they eat. What a perfect meal for all of us!!

Ginger is used so widely in ayurveda that it is an entire medicine chest in itself. There is an ayurvedic sutra (verse) that says that everyone should eat fresh ginger just before lunch and dinner to enhance digestion. Not only does ginger stoke the digestive fire, but it also whets the appetite, improves assimilation and transportation of nutrients to targeted body tissues, and clears the microcirculatory channels of the body.
SIMPLE SESAME NOODLES FOR WEDNESDAY

WHY WE CHOSE THIS MEAL FOR YOU!

Eastern View: The sesame seed, *Sesamum indicum*, is a tiny gem that packs a mighty punch. Each sesame seed is protected by an outer shell that naturally opens when the seed ripens (giving rise to the phrase “Open Sesame”). Sesame seed contain a good bit of dietary fiber, supporting a healthy colon. Sesame oil has been used to support numerous healthy systems in the body, including the nervous system, bones and muscles, skin and hair, the digestive tract including the colon, and the male and female reproductive system.

The sesame seed, from an Ayurvedic perspective, is sweet, pungent, astringent, and bitter, and has a heating effect. Its greatest benefit is in balancing vata. The heating nature of sesame can also be good for kapha. Makes it a perfect meal for you. It grows in a dry climate, and in turn, is beneficial when the dry quality is in excess.

Nourishing, calming, and warming, sesame oil is a fundamental part of Ayurveda. Sesame oil is highly beneficial for the entire system from head to toe. Ayurveda suggests the daily use of this oil and is said to heal and cleanse internal and external wounds, as well as improve the power of digestion and metabolism, and enhancing intelligence.

Western View: Sesame seed oils are heart-healthy choices for Vata/Kaphas that can be prone to heart disease. It supplies unsaturated fats as well as certain nutrients.

Sesame oil is rich in vitamin E (potent antioxidant), iron, omega-6 fatty acids, vitamin B6, magnesium, calcium, zinc, copper, dietary fiber and flavonoids phenolic antioxidants - fantastic for the immune system which can be running a little low this time of year for Vata/Kaphas.

This time of year - you may have some drying of the skin and the presence of vitamin E and zinc in this oil helps in augmenting the elasticity of the skin; repairs damaged skin cells and promote the production of collagen.

All these enriching nutrients make Sesame oil a powerful antioxidant with antibacterial, antifungal, anti-inflammatory, antiviral, immune-stimulant, restorative, anti-rheumatic, carminative, tonic, anti-diabetic, anti-atherogenic, cardiac, dermatologic, laxative, emollient, warming and antidepressant properties. That’s great for all doshas in the winter!

Sesame oil can fight off free radicals. Free radicals cause damage to our DNA, cells and proteins. This kind of damage can lead to diseases like Alzheimer’s and Parkinson’s and cancer. Certain substances like alcohol, tobacco smoke, pesticides, air pollutants and the food we eat generate free radicals. It’s important we eat a diet rich in antioxidants, to fight free radical damage and reduce oxidative stress.

Studies are showing that Sesame oil could be useful for combating arthritis, cancer progression, nerve injuries and inflammation.
PREPARE AHEAD
Slice the green onions and mince garlic.

INGREDIENTS
6 ounces, fluid thin noodles, cooked and drained
4 tablespoons soy sauce
1 tablespoon sugar
2 cloves garlic, minced
1 tablespoon rice vinegar
1 1/2 tablespoons pure sesame oil
1/4 teaspoon hot chili oil
2 tablespoons canola oil
2 whole green onions, sliced thin

Serves: 2
Prep Time: 10 minutes
Cook Time: 10 minutes

NOTE
To make this more robust, add some protein like tofu or chicken. Often, simple is best. There are so many wonderful, inherently delicious flavors in the most simple ingredients. You don’t always have to a long list of ingredients and a complicated set of instructions to make something utterly delicious. Sesame noodles fall under that umbrella.

DIRECTIONS
Whisk all ingredients (except the noodles and the green onions) together in a bowl. Taste and adjust the ingredients as needed.

Pour the sauce over the warm noodles and toss to coat.

Sprinkle with the green onions and toss.

Serve in a bowl with chopsticks. Yummy!

IF YOU ARE SHARING WITH A:

Pitta | Your Pitta friends may need you to reduce the garlic and chili oil. However, you can also add a cooling bunch of cilantro or mint to this dish; that way you will not fire them up.

Kapha | A super dish for Kaphas but, they may need to add some more chili oil.

Vata/Pitta | As this meal is a little heating, garnish heavily with cilantro or mint.

Vata | A super dish for Vatas, they can add a teaspoon ghee for a more grounding effect.

Pitta/Kapha | I hope you made enough, they will be asking for more!
VIBRANT COCONUT GREEN CURRY FOR THURSDAY

WHY WE CHOSE THIS MEAL FOR YOU!

**Eastern View:** Coconut has the following qualities...sweet, cooling, heavy and it balances Vata, can be a little heavy for Kaphas - but the digestive spices lighten this meal up for you.

Coconut is a highly regarded food in Ayurveda. It is predominant in the sweet taste, has a cooling effect on the body and also a sweet post-digestive effect. It balances the vata in you but in excess can aggravate kapha. Although it is relatively heavy and difficult to digest, it is useful in small amounts to nourish and invigorate the body and promote contentment and satisfaction in the mind – due to its sweet taste.

Coconut is grounding and - a mixture of heavy, oily and sweet to pacify Vata and Kapha. Ayurveda considers coconut a natural stress-buster. And in this dish the coconut combined with spices like cinnamon, cardamom, ginger, cloves, cumin, coriander, and turmeric, (typically found in curry powder) - coconut is not only delicious and versatile, but also heals the digestive system and promotes better metabolism.

**Western View:** From a Western perspective, coconut is a gluten-free, alkaline food high in saturated fat and fibre. It also contains protein and some important minerals – calcium, iron, potassium and magnesium. Due to its high fat content it is low GI and will decrease the overall GI of any meal when added. This helps in reducing the extra pounds that the Kapha in you can put on!

Obesity is currently one of the biggest health problems in the world. While some people think obesity is only a matter of calories, others (myself included) believe that the sources of those calories are important too.

The American Journal of Clinical Nutrition states that the medium-chain triglycerides (MCTs) in coconut oil can increase how many calories you burn compared to the same amount of other fats. The European Journal of Clinical Nutrition reports on one study that found that 15-30 grams of MCTs per day increased 24 hour energy expenditure by 5%, totalling about 120 calories per day.

Almost 50% of the fatty acids in coconut oil is the 12-carbon Lauric Acid. When lauric acid is digested, it forms a substance called monolaurin.

The Journal Antimicrobial Agents and Chemotherapy show that both lauric acid and monolaurin can kill harmful pathogens like bacteria, viruses and fungi.

For example, these substances have been shown to kill the bacteria Staphylococcus Aureus (a very dangerous pathogen) and the yeast Candida Albicans, a common source of yeast infections in humans.

The fatty acids and breakdown products in coconut can kill harmful pathogens, potentially helping to prevent infections and inflammation.
PREPARE AHEAD
Thaw spinach, mince ginger and garlic, dice shallots.

INGREDIENTS
1 tablespoon coconut oil
2 cloves garlic, minced (2 tablespoons)
1 shallot, diced
1/2 tablespoon minced ginger
1/2 tablespoon curry powder, plus more to taste
4 ounces frozen spinach (3/4 cup, slightly thawed)
1 1/3 cup light coconut milk (most of a 14-ounce can)
1/2 tablespoon coconut sugar, plus more to taste
(or sub stevia or maple syrup to taste)
Sea salt to taste (1/4 teaspoon)
optional: 1-2 tablespoons cornstarch or arrowroot starch (to thicken)

Serves: 2
Prep Time: 30 minutes
Cook Time: 10 minutes

NOTE
Serve with basmati rice for the ultimate, satisfying plant based meal!

DIRECTIONS
Heat a large, rimmed skillet or pot over medium heat. Once hot, add oil, garlic, shallot, and ginger. Cook for 3-4 minutes, stirring frequently until softened and slightly browned. Add curry powder and frozen spinach and cook for 3-4 minutes, stirring occasionally. Add coconut milk, coconut sugar, and sea salt (about 1/8 teaspoon to start).

Simmer about 4 minutes. Remove from heat and carefully transfer the curry to a high-speed blender (or use an immersion blender). Blend on high - you can add some cornstarch or arrowroot starch to thicken and blend once more to fully combine. This is optional but does provide the sauce with more thickness/body.

While still in the blender, taste and adjust flavors as needed. Transfer curry back to the skillet or pot and heat over medium heat until bubbling. Reduce heat to low and cook until slightly thickened - about 5-10 minutes.

IF YOU ARE SHARING WITH A:

Pitta | Add a mint yogurt (see Vata/Pitta below) and toasted coconut as a garnish.

Kapha | The heat of a curry can clear that kapha sluggishness. They will love this meal.

Vata/Pitta | Your Vata/Pitta guests may like a mint yogurt added to this meal. Just add a teaspoon dried mint to 1 cup yogurt and mix well with salt and pepper to taste.

Vata | A good meal for Vatas for this time of year. No modifications are needed.

Pitta/Kapha | Even though this curry is heating, the coconut reduces the digestive heat to the point of enjoyment!
ONE POT CHICKPEA SHAKSHUKA FOR FRIDAY

WHY WE CHOSE THIS MEAL FOR YOU!

Eastern View: Garbanzo beans, also called chickpeas and may be better known when made into hummus, have been the mainstay of the Mediterranean and Indian diets for thousands of years. Only recently have the health benefits been more fully understood.

Garbanzo beans are one of the most common beans in Ayurveda because they are easy to digest compared to other beans.

Most beans have a very hard shell composed of hard-to-digest anti-nutrients that require soaking, par-boiling, slow cooking and a good, strong digestive system.

Ayurveda always puts a strong emphasis on foods that are easy to digest and good for the intestines. The two top, easy-to-digest beans are garbanzo beans and split yellow mung beans, which we use in our Cleanses either alone or in the Ayurvedic superfood, kitchari.

Western View: As with all beans, chickpeas are LOADED with fiber and high in protein – which the Vata in you needs during winter. Garbanzo beans have some special nutrients on board such as quercetin, which supports healthy circulation and immunity, and chlorogenic acid, which is the antioxidant that has made coffee famous.

They are also rich in vitamins like folate, riboflavin, niacin, thiamin and beta-carotene and minerals such as magnesium, potassium and manganese. They are an excellent source of health-promoting fatty acids like linoleic and oleic acids, which are the main ingredients in olive oil.

Garbanzo beans are rich in both soluble and insoluble fiber. Insoluble fiber acts as roughage to scrub the intestines and support healthy and efficient bowel function while feeding beneficial microbes, that's going to reduce any Vata digestive problems like constipation, gas and bloating. The Journal of Nutrients reports that the soluble fiber, makes the garbanzo bean a bit slimy and allows it to attach to bile acids in the intestines and escort the bile, cholesterol and toxins attached to the bile to the toilet.

Garbanzo beans are also rich in resistant starches like oligosaccharides and amylose, which are sugars that are not digested into the small intestine and are delivered to the large intestines where they can feed the good gut bacteria. These naturally-occurring resistant starches in chickpeas have been shown to help stabilize blood sugar levels in the short term states a study done by the American Journal of Clinical Nutrition.

The British Medical Journal reported on one study where a group of volunteers were split off into three groups: a high-fat diet, a low-fat diet and a high-fat diet with garbanzo beans. The group that ate a high-fat diet along with garbanzo beans saw a 15 percent reduction in cholesterol and a significant increase of bile acids (which carry toxins and bad cholesterol) in the stool. The garbanzo-eating group outperformed both the high- and low-fat diet groups.
PREPARE AHEAD
Prepare veggies. Rinse and drain chickpeas.

INGREDIENTS
1 tablespoon olive or avocado oil
1/4 cup diced white onion or shallot
1/4 red bell pepper, chopped
2 cloves garlic, minced
1 14.5 ounce can diced tomatoes
1 1/2 tablespoons tomato paste
1/2 tablespoon coconut sugar or maple syrup
Sea salt to taste
1 teaspoon smoked or sweet paprika
1/2 teaspoon ground cumin
1 teaspoon chili powder
1/8 teaspoon ground cinnamon
optional: dash of cayenne pepper
optional: dash each of cardamom and coriander
optional: 1 15-ounce cans chickpeas, rinsed and drained
optional: 2-3 kalamata olives, pitted and halved

Serves: 2
Prep Time: 10 minutes
Cook Time: 30 minutes

NOTE
Savory, flavorful shakshuka with chickpeas made in 1 pot in 30 minutes! A hearty yet healthy dish suitable for breakfast, lunch or dinner.

DIRECTIONS
Heat a large rimmed metal or cast iron skillet over medium heat. Once hot, add olive oil, onion, bell pepper and garlic. Sauté for 4-5 minutes, stirring frequently, until soft and fragrant.

Add diced tomatoes, tomato paste, coconut sugar, sea salt, paprika, cumin, chili powder, cinnamon, cayenne pepper (optional), and cardamom and coriander (optional). Stir to combine.

Bring to a simmer over medium heat and cook for 2-3 minutes, stirring frequently. If you're OK with a chunkier texture, leave as is. Or, scoop 3/4 of the sauce in the blender and blend until smooth for a creamier result!
Add chickpeas and olives (optional). Stir to combine, then reduce heat to medium-low and simmer for 15-20 minutes to allow the flavors to develop and marry with the beans.

Taste and adjust seasonings as needed and serve over basmati rice.

IF YOU ARE SHARING WITH A:

Pitta | Pittas should eat this meal sparingly. Add cumin and coriander. Take out the pepper, tomato paste and paprika. Add a cilantro garnish and a cooling yogurt dip.

Kapha | No olives for your Kapha friends - but increase those heating spices like paprika, and cayenne.

Vata/Pitta | Add the cumin and coriander digestive spices, and add cilantro as a garnish.

Vata | No need for modifications for Vata - serve with some flatbread and ghee.

Pitta/Kapha | No olives for your Kapha friends - but increase those heating spices like paprika, and cayenne.
